

Practice Area Enterprise Reporting

Predictable success in an unpredictable world.

Ideal Health IT provides enterprise reporting as one of our key practice areas. Enterprise reporting, to support a variety of internal and external requirements, are growing significantly. Ideal Health IT consultants work with organizations to understand the needs, build a comprehensive data model for enterprise reporting and execute an overall program based on the requirements. **Reduce risk. Deliver results. Choose Ideal Health IT.**

Practice Area focuses on Enterprise Reporting

Healthcare organizations are facing a progressive escalation of reporting needs and requirements as part of their continuing clinical operations. Internal and external reporting requirements are more pervasive than ever. Pay for performance programs, quality initiatives, varied state and federal compliance programs, billing support, public surveillance, health plan requirement, care management, utilization management and many other programs are driving the behavior. Meaningful Use will only add to this requirement. However, with these escalating requirements comes opportunity as there is funding aligned with effective reporting of Meaningful Use metrics.

Ideal Health IT is providing organizations an enterprise offering to integrate and manage their portfolio of reporting needs as a comprehensive program. Much of the data required for various reporting programs come from common data sources. Enterprise interoperability and integration, while complicating the technology environment, provide opportunities for data sharing and enterprise management of the required reporting data.

Ideal Health IT consultants have a detailed understanding of all key reporting programs and will work with you to define, build and manage a comprehensive reporting program. Working with key clinical, operational, technical, financial and compliance resources on your team, we work to assure the overall reporting program integrates across your enterprise and meets your overall needs. Key elements of this enterprise reporting program include:

- Existing reporting program audit
- Gap analysis to overall reporting requirements
- Data analysis and reporting program design and architecture
- Development of reporting programs
- Training users on effective management and use of reporting programs
- Audit support as required

Individual Pathways

At Ideal Health IT, we recognize that each and every client is unique. Our goal is to support you through the complexities of business change by helping to select and chart clinical and technical pathways that match your individual needs and circumstances. By focusing exclusively on the health information technology market, we understand the challenges you face. We bring a client-centric approach, coupled with verified best practices, to help you through these complex changes and we work closely with you to build a sustainable model for aligning change with strategic objectives.
