

Practice Area Program Management

Predictable success in an unpredictable world.

Ideal Health IT provides comprehensive services to manage large health IT system implementations. These implementations are actually a series of multi-faceted projects that should be managed as a comprehensive “program”. Ideal Health IT delivers based on industry best practices for program management to assure overall success. As your partner, you can rely on us, Ideal Health IT. **Reduce risk. Deliver results. Choose Ideal Health IT.**

Practice Area focuses on Program Management

Healthcare organizations are faced with the daunting task of enterprise health IT systems adoption. These large scale programs not only touch every facet of the organization, the organization itself is often changing as a result. Roles are changing, sometimes dramatically, and the extended enterprise is becoming integrated. All of this change drives the need for multiple projects and coordination and collaboration of these projects under a defined and integrated program. Fundamentally, program management and project management are inter-related but vastly different.

Ideal Health IT has created a practice area for program management based on industry best practices to serve your needs. We have consultants with extensive program management and project management experience on health IT system implementations. Our consultants will collaborate with you from the earliest phase of the planning process all the way through to post production operations. The Ideal Health IT practice area for enterprise program management includes:

- Strategic assessment
- Program readiness assessment
- Executive and clinical engagement
- Program office setup and process definition
- Communication management
- Program assurance
- Performance management

Individual Pathways

At Ideal Health IT, we recognize that each and every client is unique. Our goal is to support you through the complexities of business change by helping to select and chart clinical and technical pathways that match your individual needs and circumstances. By focusing exclusively on the health information technology market, we understand the challenges you face. We bring a client-centric approach, coupled with verified best practices, to help you through these complex changes and we work closely with you to build a sustainable model for aligning change with strategic objectives.

Ideal Health IT Consultants - Expertise you can rely on.

When you partner with Ideal Health IT, you have the assurance and the confidence that our consultants will bring the clinical informatics and functional expertise necessary to meet your every health IT service need. Our consultants have extensive experience with a variety of health IT systems including: Allscripts/Eclipsys • Cerner • eClinicalWorks • Epic • GE Healthcare • McKesson • MEDITECH • Nextgen • and many more.
