

## Practice Area System Implementation

### Predictable success in an unpredictable world.

Ideal Health IT provides comprehensive services to lead you through the complexities of enterprise health IT systems implementation in acute care and ambulatory environments. Now more than ever with significant ARRA funding available to you, it is important to leverage this opportunity. Ideal Health IT consultants have extensive project and functional experience. **Reduce risk. Deliver results. Choose Ideal Health IT.**

### Practice Area focuses on System Implementation

Healthcare organizations are faced with the daunting task of enterprise clinical systems adoption, extensive integration to various disparate internal and external systems, clinical information and data sharing across the healthcare community, all while maintaining a comprehensive privacy and compliance program that assures patient confidentiality. Additionally, your organization is faced with role modification and extensive training to understand and leverage these new technologies.

Ideal Health IT can help you deliver successful clinical implementations across your enterprise. Our expert health IT and clinical consultants understand how important it is to meet clinical, operational and technical objectives to deliver health IT systems success. Ideal Health IT provides:

- Program office set up and oversight
- Business, clinical and operational change assessment
- Clinical and operation workflow re-engineering
- Project management and change management
- System implementation, configuration and integration
- Planning for future integration and interoperability
- Data integrity testing and assurance
- System optimization, service delivery and support planning
- Compliance and quality reporting
